Designers of all countries, unite! At least on a joint marketing platform. The ambition is to spray the young, cool spirit of the involved designers around the world and to offer their innovative and surprising products to design interested people all over the globe. The range of products is of a great variety. It goes from porcelain, ceramic, furniture, life accessories to fashion and decoration up to pet furniture. On this marketing platform the members can additionally look for an appropriate manufacturer for their fully developed ideas.

On designspray now all designers, artists and creative people, who have something to sell, can register for free and sell their products via the shop. It is also possible to find a manufacturer for thought-through ideas. The designer benefits from the synergy effect created, the joint marketing activities and PR. And he saves on the equipment and costs for his own shop. The customer purchases directly through the designer and gets to know the creative individual behind the relevant product. Thanks to the joint forum there is a huge selection of wonderful and individual products.
